INAUGURAL SUSTAINABILITY REPORT FY2021

Mincor Resources NL (ASX: MCR, “Mincor” or the “Company”) is pleased to advise that it has today released its inaugural Sustainability Report for Financial Year 2021 (FY2021).

The Sustainability Report marks an important step in the Company’s environmental, social and governance (ESG) journey as it prepares to recommence nickel concentrate production at its Kambalda Nickel Operations in Western Australia in the June 2022 quarter.

The Report – which has been produced in alignment with the United Nations Sustainable Development Goals (SDGs) – sets the tone for the Company’s future ESG goals and aspirations as well as reporting on key sustainability activities over FY2021. It also establishes a framework for expanded reporting over future editions.

Mincor’s Managing Director, David Southam, said: “We hope that our inaugural Sustainability Report serves as an enduring highlight of the people, operations and landscapes that make Mincor unique.

“In addition to outlining the key achievements and developments in this area during FY2021, our inaugural Sustainability Report establishes a robust framework for reporting and continued growth in the depth and capability of our business, helping to ensure that we have the correct priorities, processes and systems in place to become a class-leading nickel sulphide producer with a strong focus on sustainability and excellence in all of the key elements that make up a strong ESG framework.”
